X64 系统下 ASPEN V9.0 安装教程

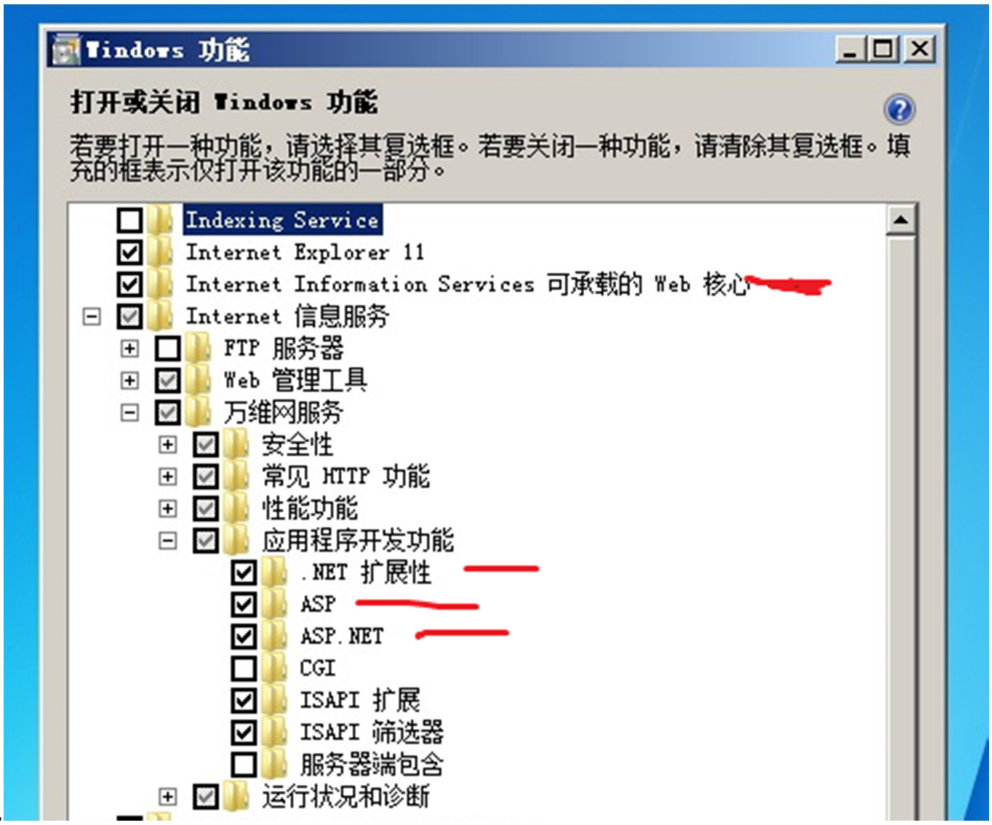

1. 安装微软和第三方必须控件：a. Microsoft .NET Framework 4.6.2

   b. SQLExpress 2012 SP1 X64 CHS

   c. jdk-8u112-windows-x64(非必须)

   d.确认以下几项系统功能是否打开

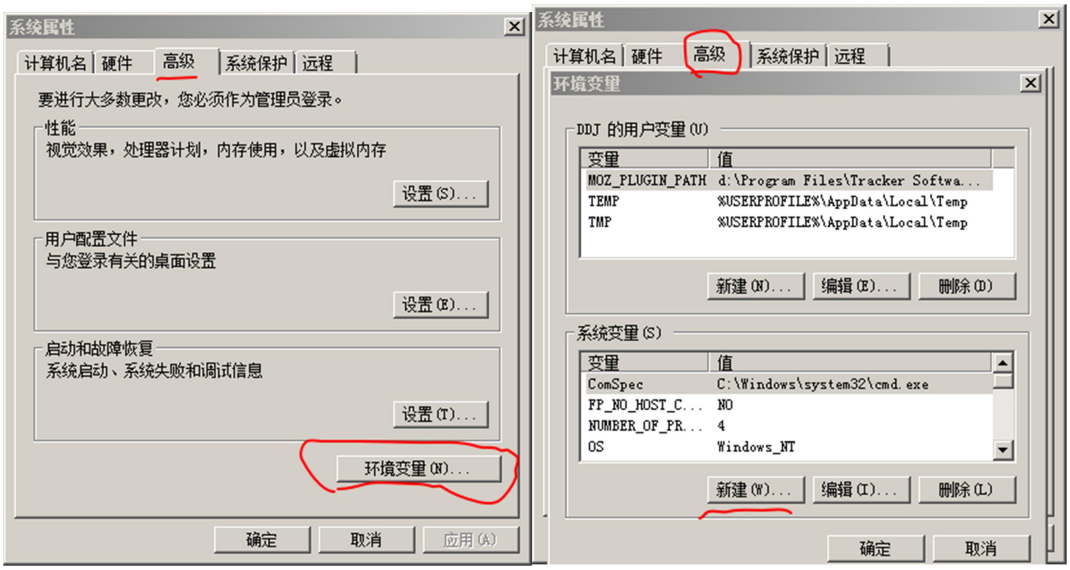

2.断开网络，固定 IP 地址，不设置 DNS 和网关。保证电脑不联网，。

禁用多余网卡。

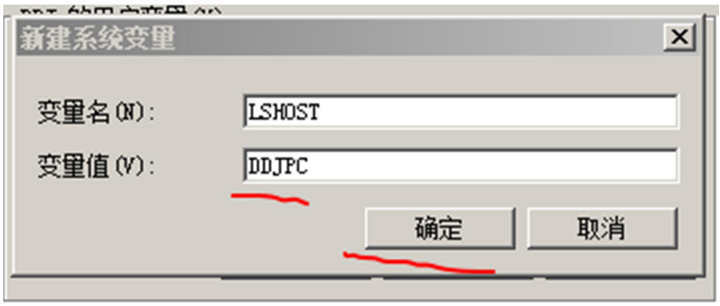

3.设置环境变量 LSHOST={your pc}，计算机右键属性

保证变量值为你的计算机名字

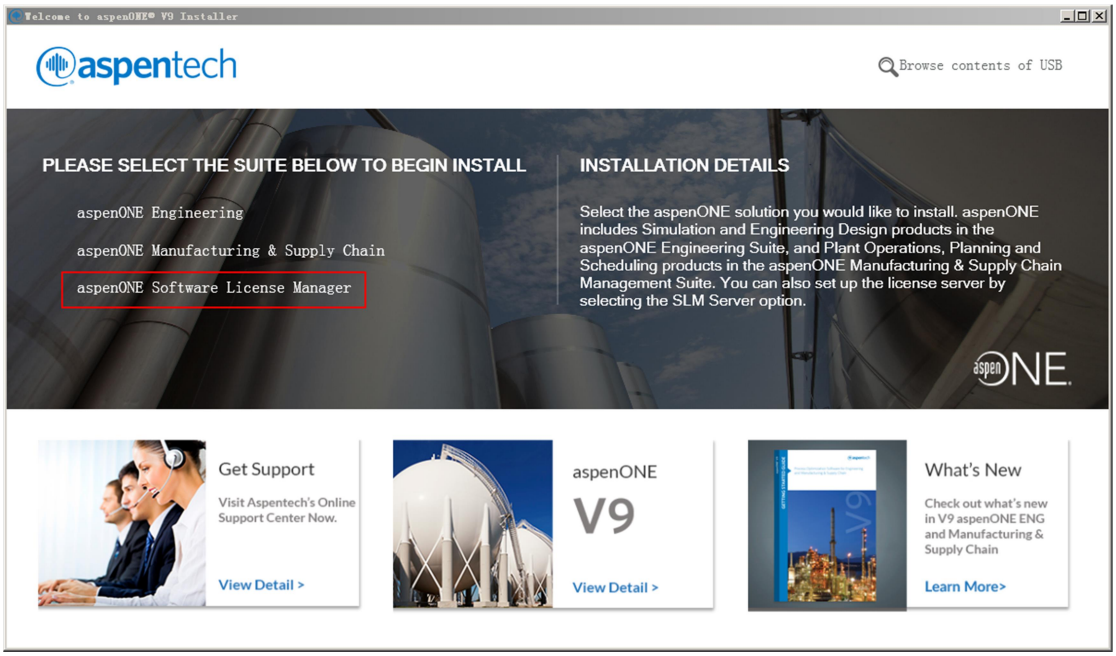

计算机名称。计算机（我的电脑）鼠标右键-属性

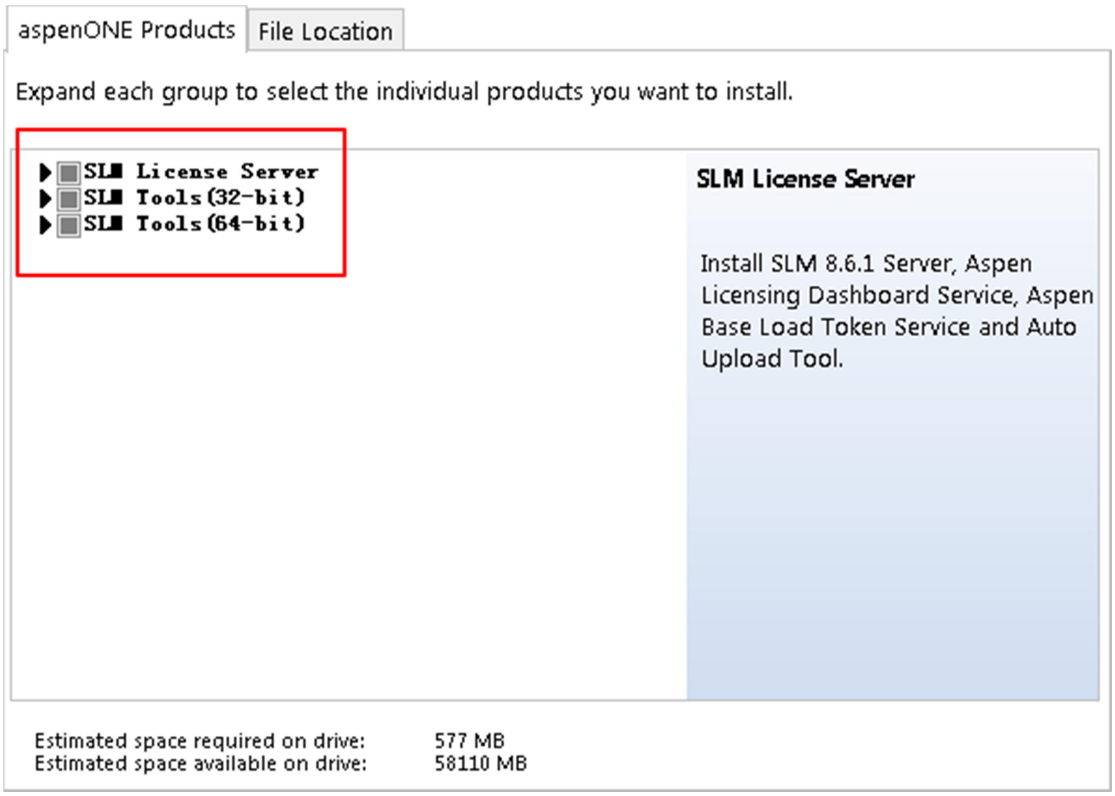

计算机名称、域和工作组设置

计算机名:	DDJPC
计算机全名:	DDJPC
计算机描述:	
工作组:	WORKGROUP

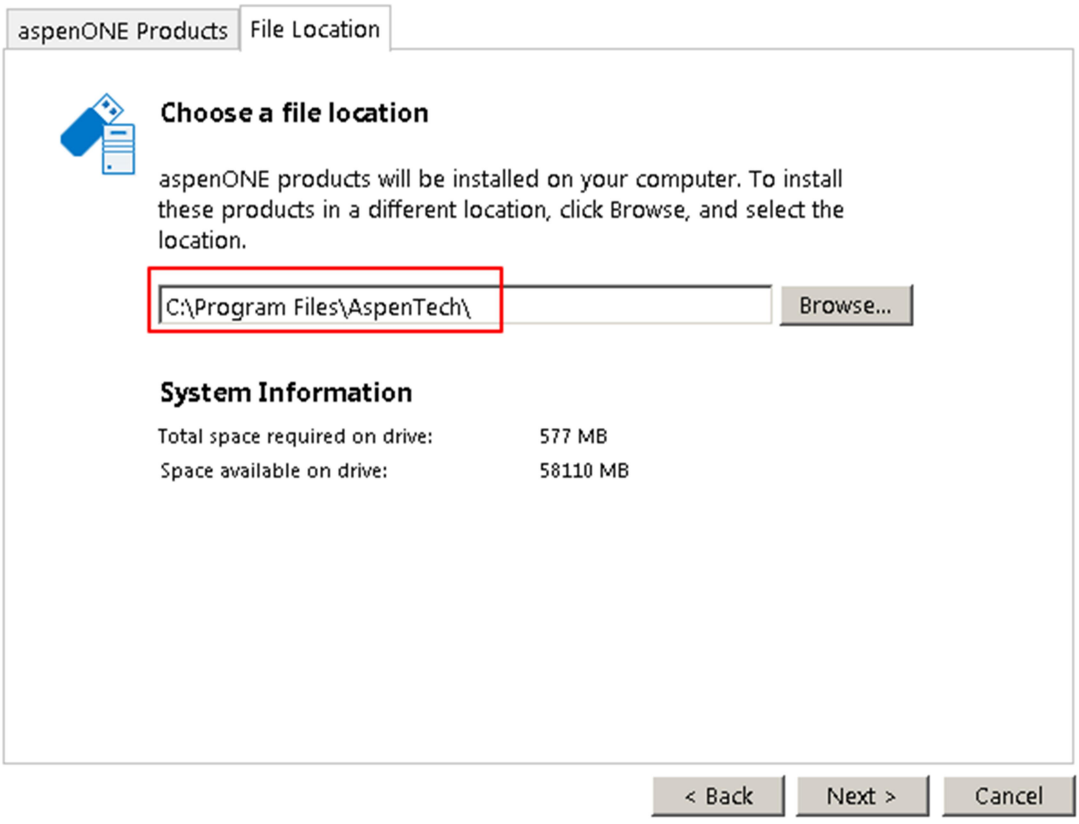

4.安装 aspenONE Software License Manager（SLM）

名称	修改日期	类型	大小
aspenONE_V9_ENG	2017/5/14 12:43	文件夹	
aspenONE_V9_MSC_P	2017/5/14 12:44	文件夹	
aspenONE_V9_SLM	2017/2/9 5:36	文件夹	
Documents	2017/2/9 5:34	文件夹	
New Crack	2017/1/1 1:47	文件夹	
config	2016/8/11 14:51	XML 文档	2 KB
Setup	2016/8/11 14:51	应用程序	1,985 KB

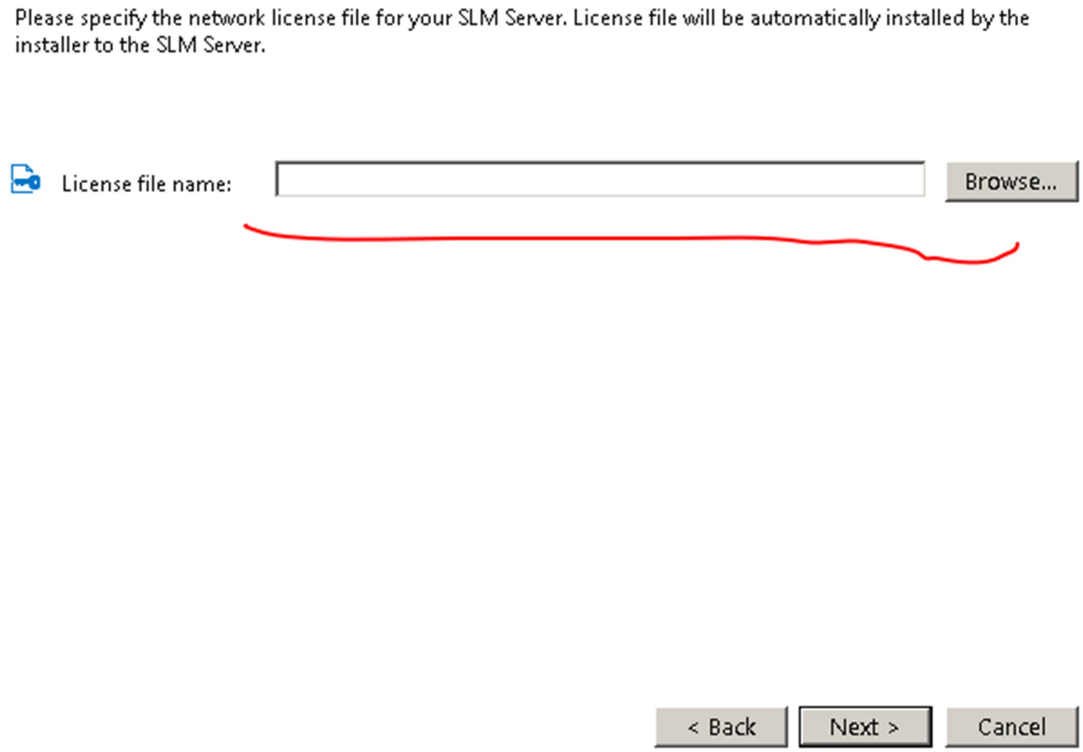

保持默认状态

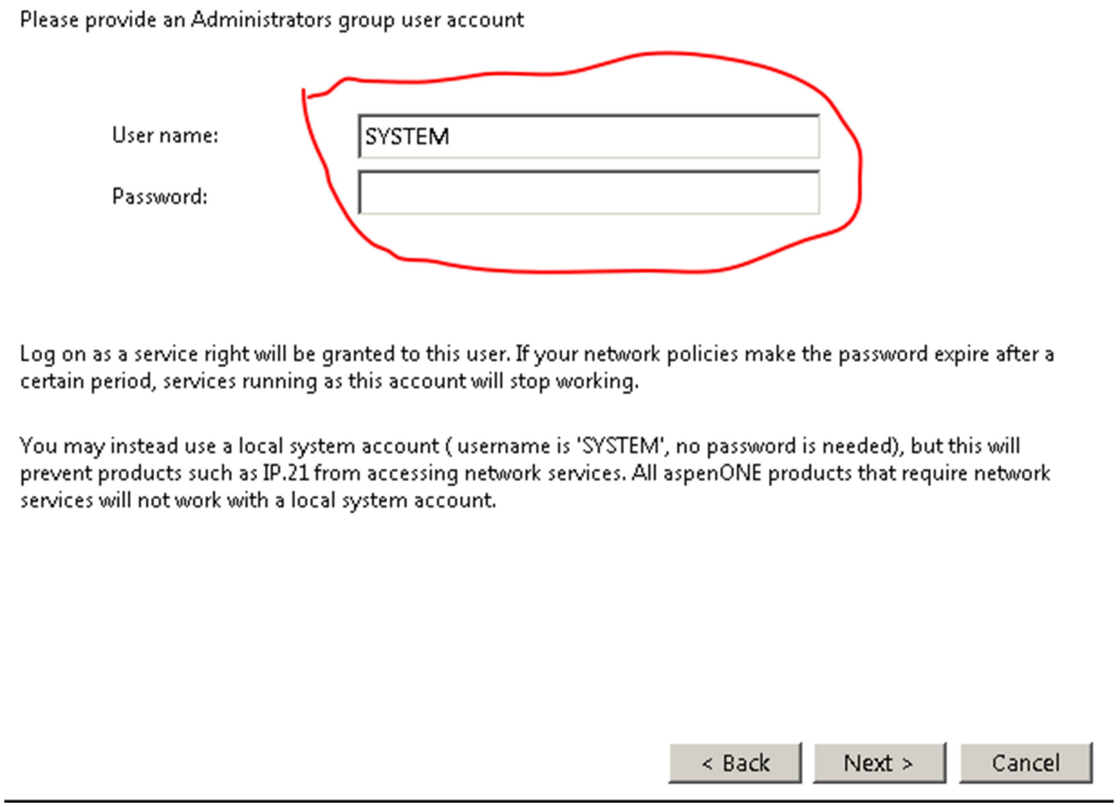

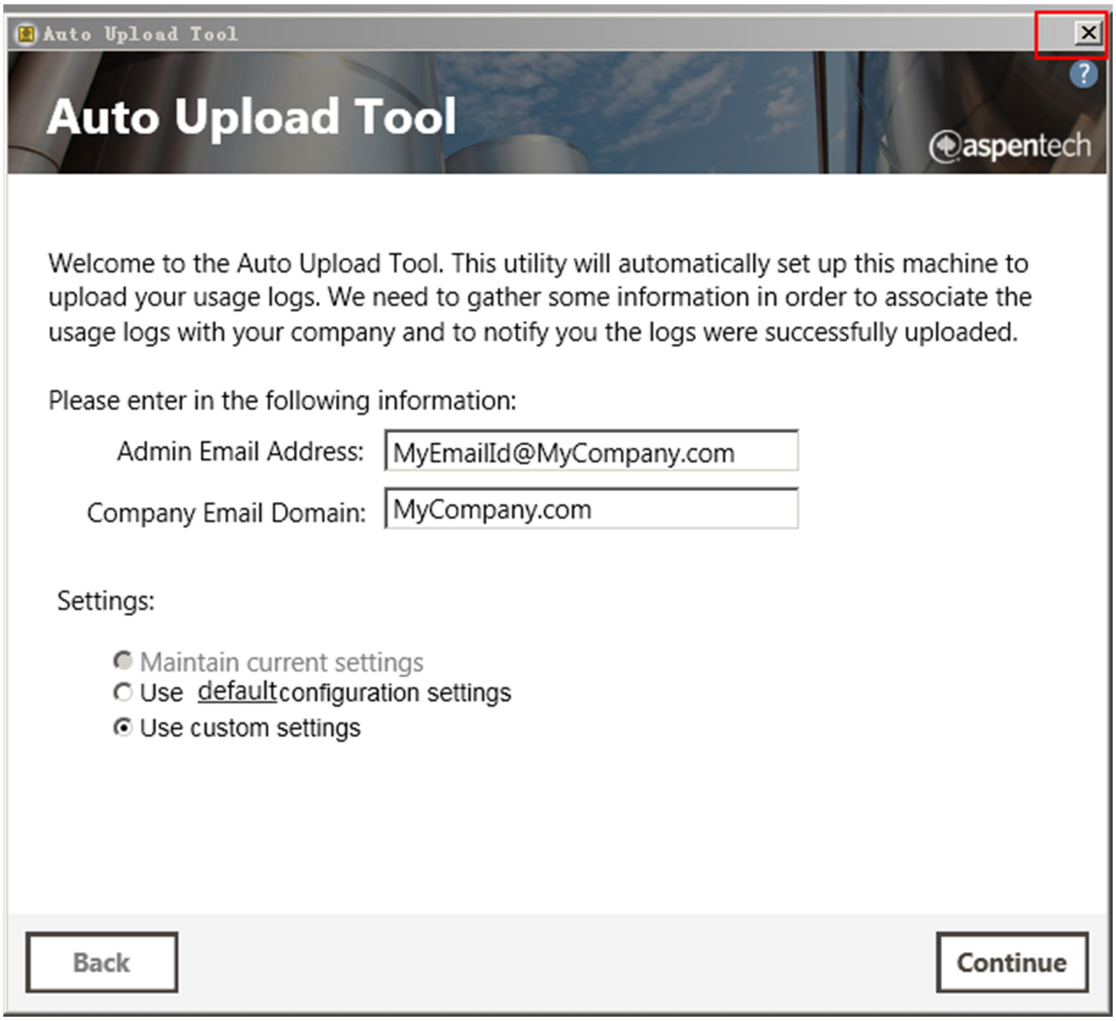

根据需要填写。（选定这个文件夹就是后面 ASPEN 的安装文件夹，不

能改变了），所以文件夹位置请考虑好。

不填写，next

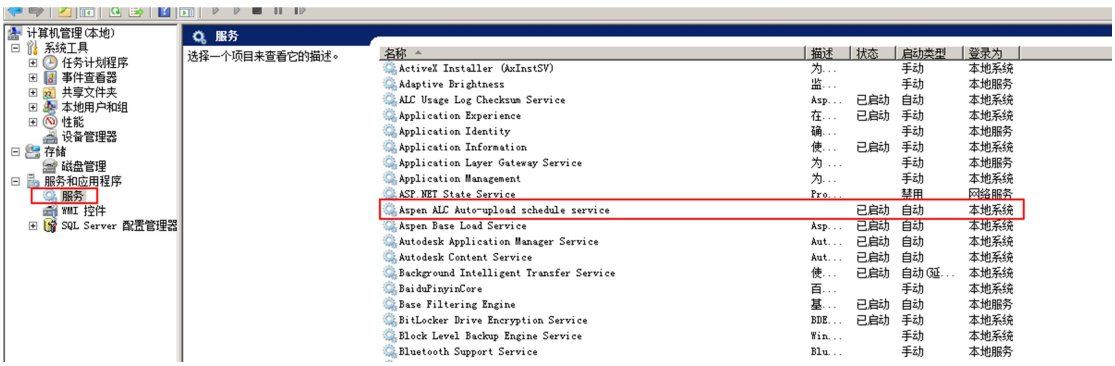

Please provide an Administrators group user account
User name:
SYSTEM
Password:
Log on as a service right will be granted to this user. If your network policies make the password expire after a certain period, services running as this account will stop working.
You may instead use a local system account (username is 'SYSTEM', no password is needed), but this will prevent products such as IP.21 from accessing network services. All aspenONE products that require network services will not work with a local system account.

Settings:
Maintain current settings
Use default configuration settings
Use custom settings
Back
Continue

直接关掉

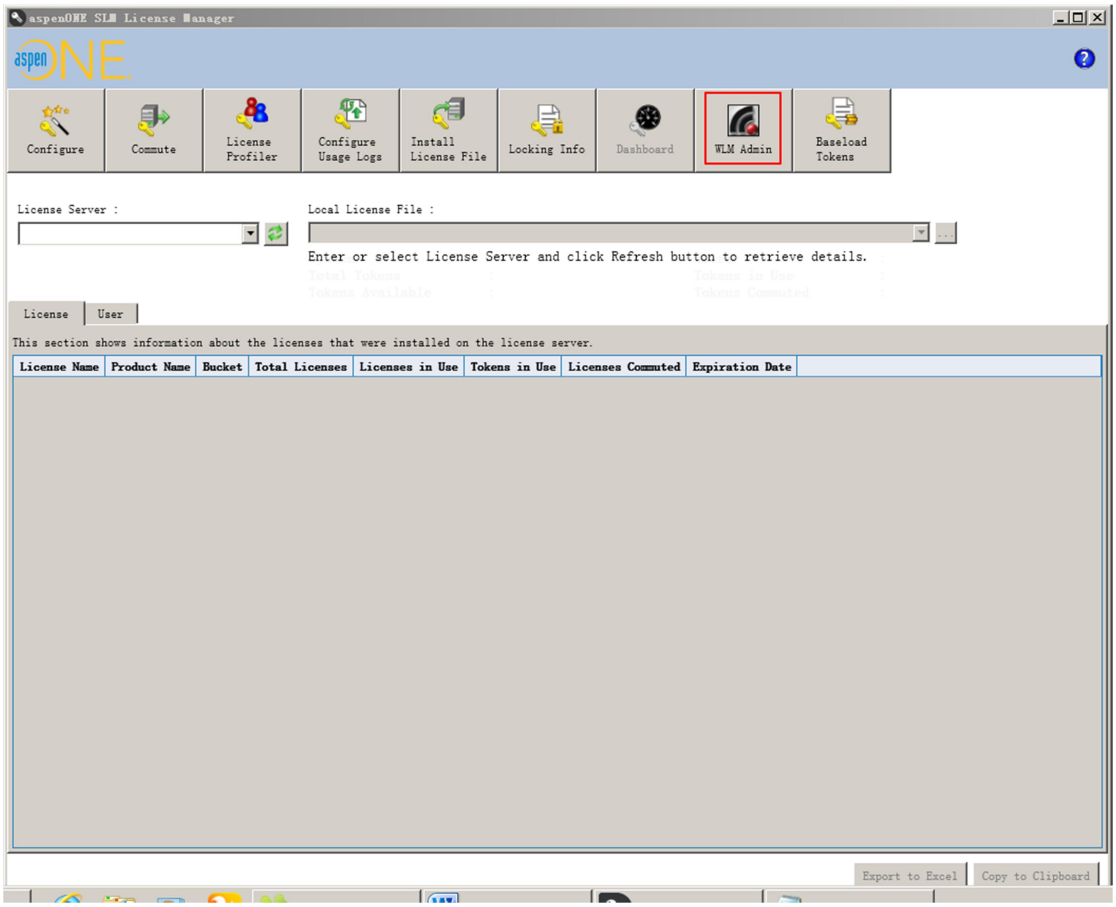

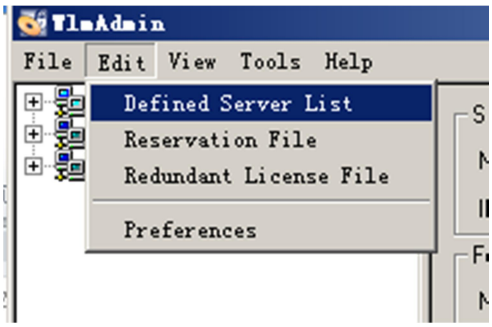

禁用"Aspen ALC Auto-update schedule service"

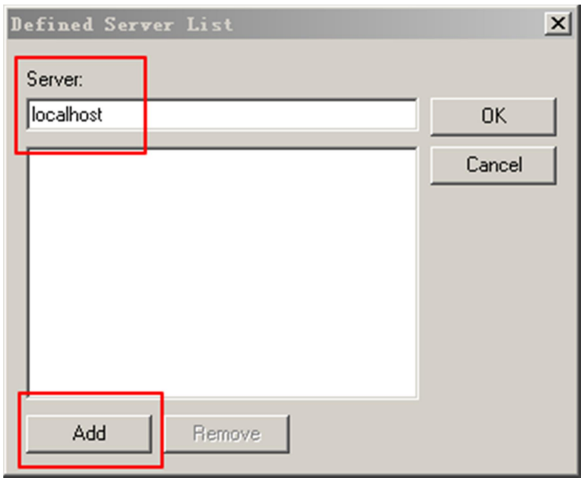

重启计算机

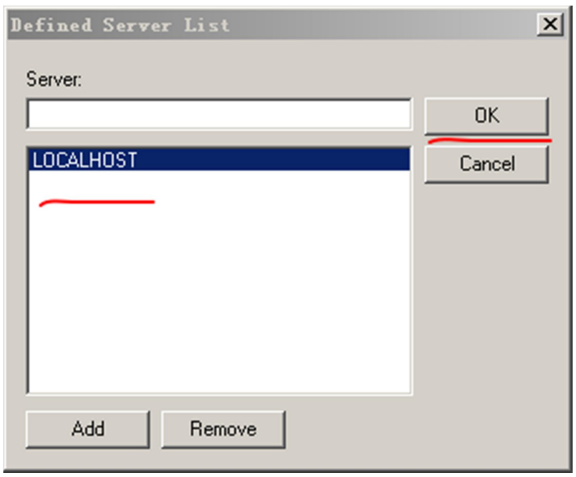

5.设置 SLM

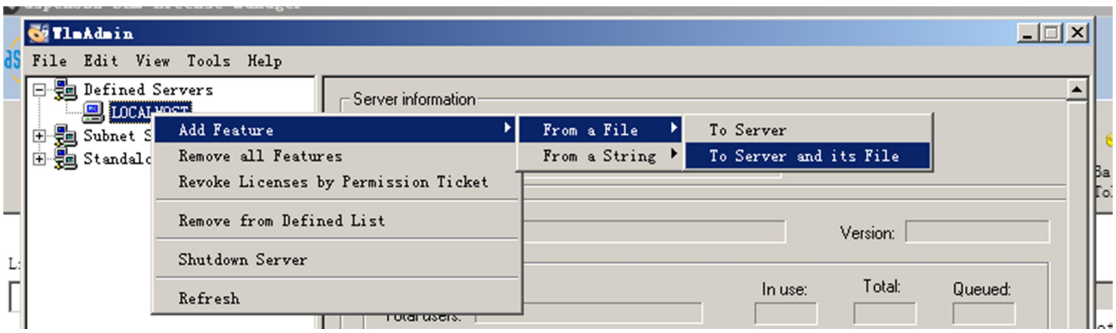

开始菜单运行：aspenONE SLM License Manager

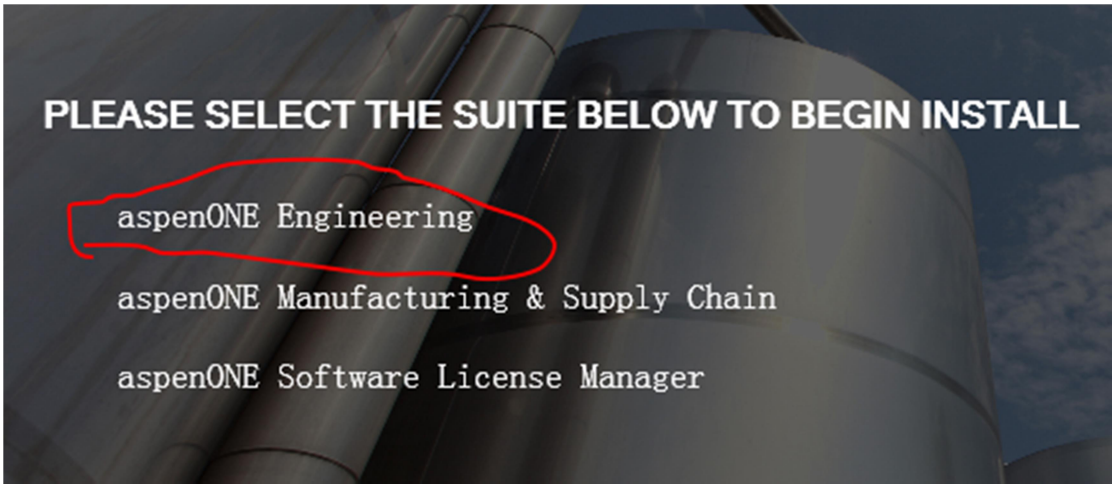

展开 Defined Servers，右键 Add Feature / From a File / To Server and its File

指定 aspenv9.slf 文件

经过漫长的等待。。。。完成

6.安装 ASPEN

aspenONE Products | File Location

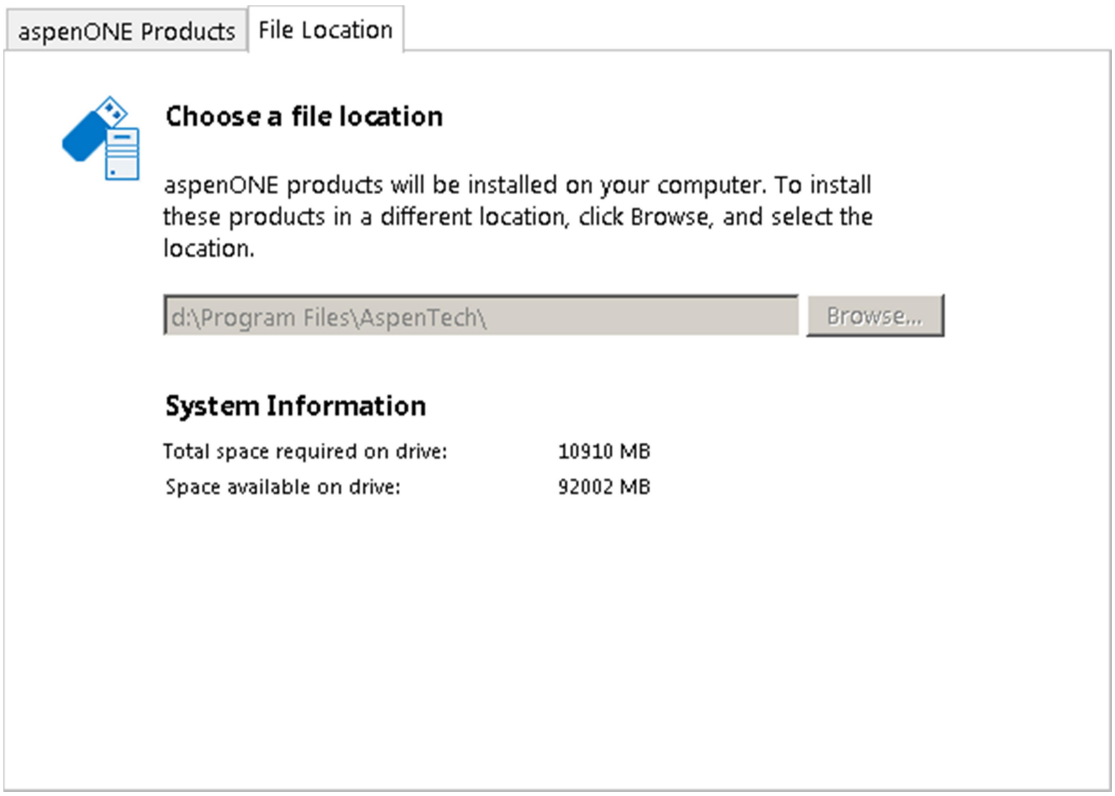

Select the product groups you want to install. To see products included in each group, simply hover over a selection.

- Process Modeling (Aspen Plus)
- Process Modeling (Aspen HYSYS)
- Aspen Exchanger Design & Rating
- Aspen Economic Evaluation
- Aspen Basic Engineering
- aspenONE Web Server
- Aspen PIMS (includes aspenONE PIMS Platinum)
- Server Products and Tools

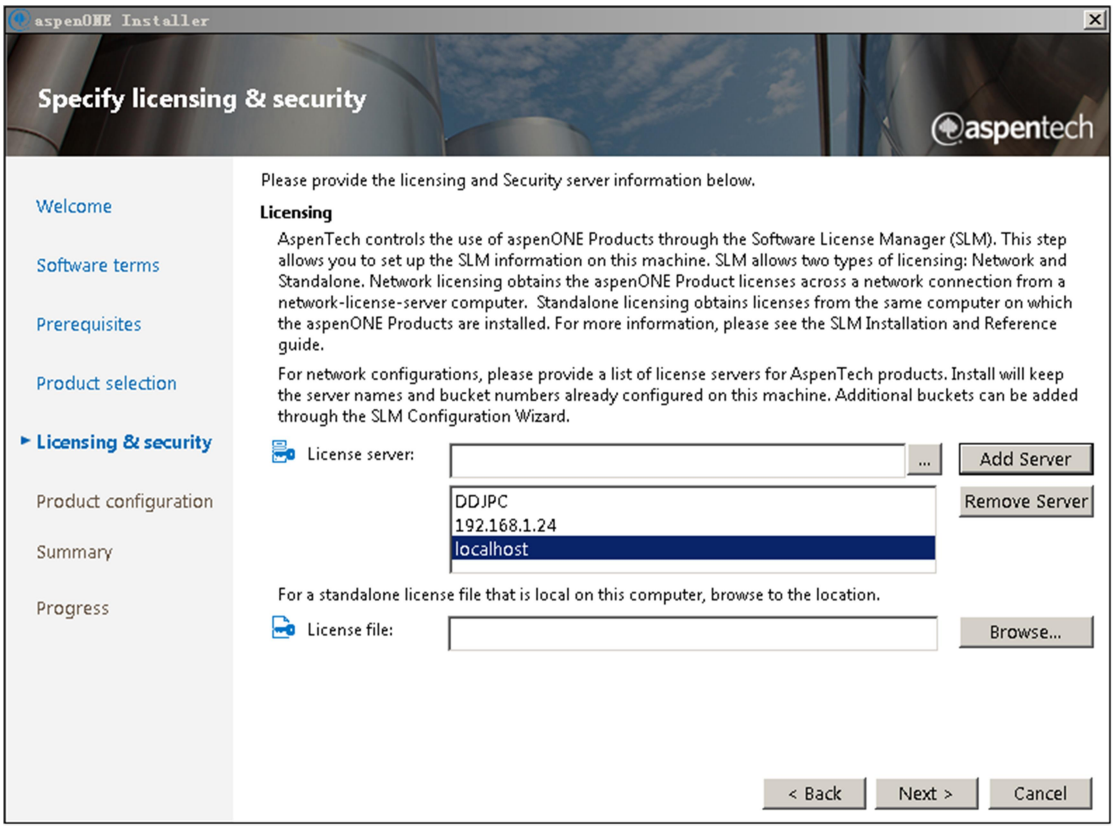

Process Modeling (Aspen Plus)

The following options will be installed: Aspen Plus including options and extensions; Aspen Custom Modeler; Aspen Adsorption; Aspen Chromatography; Aspen Energy Analyzer; Aspen Utilities Planner; Aspen Properties; Aspen Batch Process Developer; Aspen Version Comparison Assistant and Aspen OnLine. Aspen Plus requires Aspen Exchanger Design & Rating and Aspen Economic Evaluation.

Estimated space required on drive: 10910 MB
Estimated space available on drive: 92002 MB

安装位置无法更改，和 SLM 一个目录

填写自己机器的 IP 地址 add server

自己计算机名字 add server

LOCALHOST add server

后面就一路 NEXT

完工，重启

搞定。
